We only have one home
What is climate change?
It’s the shift in long-term weather patterns of an area over time.

**Weather** - Daily state of an area’s atmosphere at any given time.
**Climate** - An area’s long-term average atmospheric conditions (30 years+).

“Climate is the personality, while weather is the mood”

**Causes of Climate Change**
- Deforestation
- Burning of fossil fuels (CFCs)

**Impacts of Climate Change**
- Rise in temperature
- Ice melting
- Rise in sea level
- Animal migration
- Increased rainfall
- Increased wildfires
- Extreme heat waves
- Water shortage
- Extreme drought

**Mitigation and Adaptation**
- Reforestation
- Renewable energy
- Advocacy

“The Earth doesn’t belong to us, we belong to the Earth”

How can you reduce your carbon footprint & become a Climate Change soldier??

Proudly brought to you by the ‘Climate, Food Security and Water’ CAMP September 2021 participants: Andreas, Candy, Immanuel, Laimi, Liz, Lydia, Maria, Monique, Nelly, Simson, Timo, Tina, and Zabrina. Supervised by Ndapandula and Jess.
